AI-native engineer: production LLM systems built, tested and verified with coding agents.

Industry Experience

İMPARK Eğitim Bilişim LTD — Ankara, Türkiye
Junior AI Engineer — Mar 2026 – Present

- Build and ship production LLM systems with Claude Code as my primary development workflow, including an LGS/YKS Question Generator for math exam prep, where a second model tier independently re-solves every question before release (FastAPI, React/Vite, Gemini).
- Built a multi-agent textbook audit pipeline (independent scan lenses read a whole book, three-vote verification against the page images, change instructions for the typesetter) and a template-driven book generator that outputs print-ready HTML/PDF checked against MEB's 2025 textbook rules.
- Built a curriculum-mining pipeline extracting structured Knowledge Components from official MEB textbooks and Maarif Modeli curricula (grade-5 math and science, 440+ KCs) for an adaptive-learning platform, including prerequisite graphs and BKT/IRT enrichment.
- Introduced a TDD/BDD testing discipline (executable Gherkin scenario catalogue, CI-enforced test citations) across my İMPARK codebases; published as an open-source Claude Code plugin.
- Orchestrated multiple AI models to rewrite an MEB-curriculum 6th-grade Bilişim Teknolojileri ve Yazılım textbook: separate models draft, verify and fix content through a documented pipeline, aligning kazanım codes and "bağlam temelli" (context-based) questions to the 2025 Türkiye Yüzyılı Maarif Modeli.

Güriş Holding — Gölbaşı, Ankara, Türkiye
Associate IT Engineer — Jan 2026 – Mar 2026
IT Young Talent (Intern) — Oct 2025 – Dec 2025

- Provided IT helpdesk support, resolving users' computer, account and internet problems by switching access points or connecting them to the remote servers linked to the holding's geothermal, wind and hydroelectric (JES, RES, HES) power plants.
- Supported computer updates and resolved hardware and software issues.

Education

Middle East Technical University (METU) — Ankara, Türkiye
M.S., Data Informatics (with Thesis), GPA: 3.75/4.00 — 2025 – Present

- Thesis: "Agentic-AI-Driven Technical Management Processes Considering Technical Debt" (advisor: Assoc. Prof. Dr. Özden Özcan Top).

B.S., Computer Education and Instructional Technology, GPA: 3.73/4.00 — 2020 – 2025

Selected Projects

claude-agenting (open source) — Python · Claude Code hooks · Evals

- Claude Code plugin that routes each subagent to the cheapest model tier that does the job, chosen by an eval harness measuring success rate and cost per run.

Kutie games — TypeScript · Cloudflare Workers · Durable Objects · D1

- Three live browser games (Matching Numbers, Arrow Escape, Cobite), including real-time two-player co-op on Durable Objects; unit-tested game and room logic, deployed on Cloudflare. Built with Claude Code.

Impass (İMPARK) — Fastify · PostgreSQL · React PWA · Docker

- Internal attendance and planning system, built with Claude Code from an executable Gherkin specification (BDD) using the open-source /tdd-bdd-harness plugin; Phase 2 code-complete.

claude-mstodo (open source) — JavaScript · MCP · Microsoft Graph

- MCP server and /mstodo planning command that connect Microsoft To Do to Claude Code and Claude Desktop; ships as a Claude Code plugin, a one-click Desktop extension, or from source.

yzt-curricula (METU AI Society) — Markdown · Curriculum design

- Open self-learning curricula for AI (programming fundamentals and generative AI tracks) written for METU AI Society members and anyone who wants to learn; 13 GitHub stars.

claude-taste-detector (open source) Shell · Claude Code hooks

- Claude Code plugin that wires Emil Kowalski's design-engineering guides to impeccable's detector findings through a global hook, so motion and feel guidance loads on the first UI edit.

Research & Teaching

Research Intern, METU CEIT — LLM-based AI Writing Assistant ("Peer Feedback with LLM") Oct 2024 – Jun 2025
Professor: Assoc. Prof. Dr. Erkan Er

Teaching Assistant (Volunteer), METU — quizzes, grading, 2 substitute lectures across 3 courses Feb 2024 – Dec 2024
Professors: Prof. Dr. Soner Yıldırım, Assoc. Prof. Dr. Göknur Kaplan, Assoc. Prof. Dr. Erkan Er

President, METU AI Society — taught Python and Machine Learning courses May 2024 – Jun 2025

Skills & Languages

Technical: Python, TypeScript, SQL / PostgreSQL, React, FastAPI, Fastify, Cloudflare Workers / D1 / Durable Objects, Docker, CI, LLM Integration (OpenAI, Anthropic, Gemini), LLM Evaluation, Prompt Engineering, Agentic development with Claude Code

Languages: English (Full Professional Proficiency — YDS 83.75), Turkish (Native)
